

## Health IT Foundations - Population Health to Improve Care

The following is a detail of the modules available today with the title, description, and key skills included in the modules. We have also included follow-up actions, which we believe are the next steps in putting the new learnings into practice. We do not provide guidance or action plans in these modules. Adjustments and additions are continually occurring. Check back or inquire about updates.

| Title  | Course Description   | Key Skills  | Suggested Follow-Up Actions  |
|--|--|---|--|
| Population Health Technology                                   | Population health groups in larger customers are a hub of activity identifying patients for treatment evaluation. Learn about the capabilities of the systems pop health groups use. | <ul style="list-style-type: none"> <li>• Understand the components of population health</li> <li>• Understand who is involved in population health programs</li> </ul>  | <ul style="list-style-type: none"> <li>• Be prepared to engage population health groups</li> <li>• Explore with customers their current population health programs</li> </ul>                                |
| Using Population Health to Improve the Quality of Patient Care | Expand knowledge on population health capabilities and how these systems are used to identify patients with gaps in care or in need of an intervention.                              | <ul style="list-style-type: none"> <li>• Aligning your product objectives to population health initiatives at customers</li> <li>• Understand how to identify opportunities using reporting</li> <li>• Apply population health principles to your situations</li> </ul> | <ul style="list-style-type: none"> <li>• Use approved company resources to support population health groups</li> <li>• Be prepared to engage with customers to develop population health programs</li> </ul> |
